PROFILE

A competent and committed individual with a proven track record of completing projects from the concept to design, testing and handover. I am highly focused with a comprehensive knowledge of designing and developing a website's layout, visual appearance, and usability. I work well with others and independently using my initiative. I enjoy continuously developing knowledge of the latest frameworks and programming languages, and I am proficient in languages such as C# and others. I am now looking for a rewarding career in the Information Technology sector and am willing to complete any training necessary for the role. I am available for an immediate start.

KEY SKILLS

- Knowledge of computer systems, including operating systems, hardware, and software such as Python and Excel
- · Persistence, determination, and strong analytical skills
- Flexibility and adaptability
- Solid foundation in mathematics
- Thorough understanding of web development technologies, including HTML, CSS, JavaScript, and PHP
- Experience in building and maintaining websites and web applications
- · Ability to write computer programs for user-friendly and effective websites

EMPLOYMENT EXPERIENCE

Digital Marketer

Jill Chitty Ltd

Oct 2021 - Jun 2023

- Scheduling emails to leads using a service called Kartra (Similar to Podia and Kajabi)
- Managing the Facebook group by scheduling posts and creating online events
- Automatically gathering data using APIs and sending it to Slack or other services using Javascript and a VPS (Virtual Private Server) running Ubuntu.

EMPLOYMENT EXPERIENCE

- Designing and developing a cleaner and more efficient website using Webflow, TinyPNG, Canva and Figma (jillchitty.co.uk).
- Using Excel to collect the Facebook group analytics, such as posts, comments, reactions, and total members and calculate the difference between each month.
- Using Notion for writing down tasks and creating SOPs (Standard Operating Procedures).

Work Experience

Digitech Jan 2020 - Apr 2020

- Researching the possibilities of creating a Parent Portal App for the college as part of a team.
- Gathering and analysing functional requirements of the app by speaking to staff members.
- Managing team responsibilities and assigned individual and team tasks.
- Recommending options for ease of use and effectiveness while considering budget constraints.
- Documenting the college branding and colours of the app.
- Delivering presentations to staff about the app's use using Figma designs.
